Any tablet PC with Bluetooth

With **BlueLites:**

Stay in touch with your friends, surf on the internet, launch an emergency call, send a text message or email, listen to your favorite music using powerful speakers, open the front door, control your computer, watch a movie, switch your TV channels, control the room temperature, call your assistant,....

BlueLites is not another 'adaptation' of a PC, it is connecting your PC to the real world through a bridge that you can hardly see or feel. No cable hassle! You mount it on and off your wheelchair without interrupting your favorite program. Get mobile, stay connected.

BlueLites is small or big, you decide! Choose from 7" up to 13.1" displays and be sure that for every situation you have the best solution.

Speak out loud. The extreme powerful speakers of BlueLites guarantee that you are heard even in noisy places.
